

# GREENE COUNTY Sanitary Engineering

## Mission

Protecting the quality of life in Greene County through effective, sustainable and affordable water and recycling services.

## Core Values

Sustainability  
Safety  
Collaboration  
Excellence  
Service  
Reliability

## Vision

Reinstitute 20 years or more of serviceable life for all water and recycling assets, facilities and programs, and offer and maintain an enjoyable and rewarding workplace.

# Renewable Resources for a Greener Community.

**Help us in our mission  
to be stewards of  
the environment.**

## Audience

- Water, sewer & recycling customers
- Greene County citizens & tourists
- The environment
- Regulatory community
- Commercial and industrial base
- Community stakeholders
- Schools and community groups

## Promise

GCSED promises direct, timely contact with a member of the leadership team for any and all customer requests. GCSED also promises facility tours and educational opportunities upon request.

## Qualities

- A strong leadership that runs lean and mean
- Superb local water resources
- Unified and moving in a new direction

GCSED provides dependable drinking water, water reclamation, recycling, and environmental services. Always reliable and responsive, GCSED helps to conserve natural resources, protects the well-being of Greene County citizens, and allows the region to thrive!
